

SHIVA GARG

Data Scientist | Machine Learning & AI Automation Engineer

☎ +918130511017 ✉ shivagarg9650@gmail.com 🔗 LinkedIn 🐙 GitHub 📁 Leetcode 📍 Noida, India

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student with hands-on project experience across the data science and AI/ML stack — exploratory data analysis, recommendation systems, and deep learning (TensorFlow) — combined with strong software engineering fundamentals (full-stack development, relational and distributed databases) and practical experience building LLM-powered automation pipelines with n8n. Seeking a Data Science, Data Analyst, or AI/ML Engineering internship or full-time role to apply analytical and automation skills to real-world data problems.

SKILLS

Languages :	Python, SQL, C++, JavaScript
Data Science & ML :	Pandas, NumPy, Scikit-learn, Exploratory Data Analysis (EDA), Regression, Classification, Collaborative Filtering, Statistics
Deep Learning :	TensorFlow, ANN, CNN, RNN
Data Visualization & BI :	Power BI, Tableau, Matplotlib, Seaborn
AI Automation & LLM Engineering	n8n, LLM API Integration (Claude, GPT), Prompt Engineering, Workflow Automation, OpenRouter, Ollama, Claude Code
Databases :	PostgreSQL, MongoDB, ScyllaDB, Redis
Full-Stack & Backend :	Node.js/Express, REST APIs, GraphQL, Next.js, React
Tools :	Docker, Git, GitHub, Postman, pgAdmin, Jupyter Notebook, Figma

PROJECTS

AI Job-Seeker Automation Suite — 7-Stage n8n Pipeline (WF1–WF7) Jun 2026 - Present

- **Architecting a 7-stage end-to-end automation system** to autonomously source, score, and apply to relevant job postings: Resume Intelligence → Job Collector → Job Ranking → ATS Resume Engine → Cover Letter Engine → Application Engine → Telegram Dashboard, with multiple stages in active parallel development
- **Built and integrated LLM-based prompt scoring** (Claude/GPT) to evaluate resume-to-job fit and rank aggregated listings pulled from multiple job-board APIs
- **Used PostgreSQL** to store and query scored job entries, and integrated the Telegram Bot API to deliver real-time notifications and a dashboard view of matched job opportunities

Technologies / Tools Used : n8n, PostgreSQL, LLM APIs (Claude/GPT), Docker

Dual Recommendation System for a Social Media App Mar 2025 - 2025

- **Built a people-suggestion module** using collaborative filtering on mutual-follow graph overlap — e.g., if User A follows 3 users and shares 2 with User B, the 3rd is recommended to User B
- **Built a content (reels) recommendation module** that ranks reels by category/label similarity and an implicit engagement-rating signal engineered from watch time, likes, and skip behavior between similar users
- **Implemented the full pipeline** — data preprocessing, similarity scoring, and ranking — using Pandas, NumPy, and Scikit-learn

Technologies / Tools Used : Python, Pandas, NumPy, Scikit-learn

Social Media Ads & Reach Analytics Dashboard Mar 2025 - 2025

- **Performed exploratory data analysis** on a public ads/engagement dataset using Pandas and NumPy to uncover trends in reach, engagement, and ad performance
- **Built an interactive Tableau dashboard** to visualize key performance metrics, supplemented with Matplotlib/Seaborn statistical plots
- **Surfaced actionable insights** on content and ad performance patterns to support data-driven decision-making

Technologies / Tools Used : Python, Pandas, NumPy, Matplotlib, Seaborn, Tableau

EDUCATIONS

Mangalmay Group of Institutions | Noida, India 2023 - 2027

B.Tech

- **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Software Engineering, Computer Networks, Statistics

CERTIFICATIONS & ACHIEVEMENTS

- The Ultimate Job Ready Data Science Course — CodeWithHarry (Jun 2026)
- Solved 200+ problems on LeetCode (Arrays, Strings, Trees, Graphs, Dynamic Programming, Recursion) in C++
- Applied regression, classification, clustering, and EDA across independent ML/DS projects
- Evaluated 10+ LLMs on SWE-Bench/LiveCodeBench; set up Claude Code, Codex, and Ollama for AI-assisted development
